

Magenta Monkeys Team Contract

Daily Process:

- Morning Stand up - Host Jordan O. @ 1030
- Discuss daily tasks and establish pairs for that day
- Tasks are broken up into smaller, more manageable tasks
- Pairs will be task based
- 1 hour before switching driver/navigator roles

Establishing Norms:

- 1. What does this group do when two or more members disagree (ex. on a technical approach, a technology choice, etc)?**
 - 5 minute discussion followed by a vote
- 2. What does this group do when a member is frustrated?**
 - End of day vent discussion about how the day went and where we are at with our tasks so far. If it is with another team member, take a break, talk it out with other team members and work it out with that partner.
- 3. What does this group do when we merge our work together?**
 - Once a task is ready to be merged, they will request a reviewer/volunteer. Once reviewed, it will be staged to be merged into the main branch.
- 4. When does this group ask for help?**
 - Once we've all looked at the problem for awhile and have referred back to the docs and still cannot figure it out
- 5. How do we pair? What do we do when two group members pair with each other?**
 - Choose pairs each morning after stand up and pair program a certain feature for that day in separate zoom breakout rooms. Simple tasks can be fixed solo if need be. If requested, we can all participate in programming for certain features.
- 6. How does this group approach work "after hours" (i.e. after normal class hours and weekends)?**
 - Depending on where we are at with the project, we can choose to work on it after-hours and let the group know.
- 7. What time does this group have daily stand up?**
 - 10:30 or after REACTOs or any morning lectures.

EXTRAS:

Pairs will start alphabetically then rotate from there. Pairs stick together for that day and ideally for that particular task.
